

# NØDVARSEL

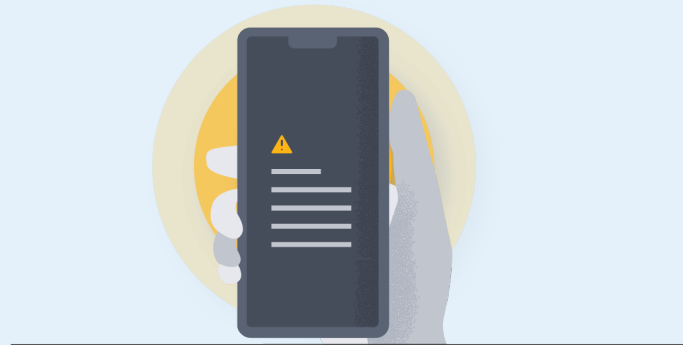

1 It is **safe** to live in Norway.

2 **However, emergencies** can still happen here.

3 **In case of emergency**, the police or civil defence may send you an emergency alert.

4 **Your phone** will vibrate and play a loud sound.

5 **Read the alert.** It tells you what is happening and what you should do.

6 **Follow the advice.** It may for example tell you to stay indoors and close doors and windows.

## Test of the Emergency Alert

The Emergency Alert must be tested from time to time. This is usually twice a year. The alert will clearly state that it is just a test. No action is required. You can see planned dates for testing at [www.emergencyalert.no](http://www.emergencyalert.no)
